

## **BLACK NITE CRASH - ARRAY**

(Custom Made Music)

Available: June 10, 2008

It's no coincidence the band name was picked from the final and most explosive single by legendary Brit-rock band Ride. Black Nite Crash continues in the same fuzz-drenched tradition of gorgeous melodies and big guitar sounds. The band's atmospheric, dynamic sound has seen them compared to The Church, The Pixies & The Jesus & Mary Chain.

Black Nite Crash formed in 2002 in their adopted hometown of Seattle. A shared love of shoegaze bands, new wave and classic sixties garage blended together into their own version of noise-pop. "We always felt a little too post-punk to be psychedelic, a little too psychedelic to be post-punk," states Jim Biggs, "but we've always seen the obvious connections: a good melody, loud guitars and a dark sense of absurdity."

*Array*, the band's full-length debut, was recorded at London Bridge Studio. Recorded & produced by Dave Hillis & Erik Blood. It is being released as an LP with a free CD version of the album included. Highlights include "Falling Down", "Soft Focus", & "Perfect Blue"
